

Alloy Web Hosting Services

Alloy Media + Marketing is pleased to offer college newspapers a solution for hosting their publication's Website – Alloy Managed Hosting.

With Alloy Managed Hosting, you can deploy network-based services or Websites, save money and simplify your workload. We do the work so you can stay focused on your core business – serving your readers and advertisers.

Safe and secure – All hosted services are located in a secure data center with redundant power systems, environmental controls, 24x7 on-site security personnel, biometric access controls and video surveillance.

Reliable – We utilize an extensive monitoring and reporting system to monitor and manage all systems with experts in systems, networks and applications from HP, VMWare, Cisco, Juniper, Redhat, Microsoft, Oracle and other major vendors.

Open – We afford a secure, web-based Customer Portal, from which you have visibility into the health of monitored systems, trouble ticket status and history, custom reporting and more.

KEY BENEFITS

- One-stop hosting including hardware, software, network services and ongoing 24x7 management
- Cost savings by reducing internal staff skill requirements
- Faster deployment of applications
- Single point of support for all infrastructure elements
- Fault-tolerant, secure enterprise-class Tier-1 data center located outside of major earthquake zones

PRICING

Each engagement is tailored to the needs of the client. Hosting services typically run between \$250 to \$500 per month, depending on data and site requirements. Our implementation team works with each client to right size the investment.
